Project Description
The Oregon Department of Transportation will begin a project in June 2018 to repave approximately six miles of Interstate 5 between the Interstate Bridge and the Moda Center. The project will also replace and upgrade existing signs on the mainline and on exit ramps, upgrade ADA ramps and replace the median barrier on the Hayden Island Bridge and near the North Broadway exit.

Project Need
The pavement along Interstate 5 between the Interstate Bridge and Moda Center has deteriorated. The roadway surface is showing signs of raveling and patching. Repaving will maintain the roadway and avoid complete replacement. It was last paved approximately 15 years ago.

DETOUR ROUTES I-5 NORTHBOUND
I-5 northbound between Fremont and Marquam Bridges full weekend closures from 10 p.m. Friday evening to 5 a.m. Monday morning: July 27-30 and August 3-6

</table>

Traffic Impacts During Construction
• Night time single and double lane, ramp and shoulder closures in both directions on I-5.
• Full overnight weekend closures on I-5 between Marquam and Fremont bridges; follow signed detour routes.
• Multiple overnight closures on several I-5 exit and entrance ramps.
• Lane closures on cross-streets near on-ramps and off-ramps.

Major closures to Interstate 84 ramps connecting to Interstate 5 this summer

ODOT is replacing the concrete and steel on the ramps that carry 147,000 vehicles on an average day. This work is needed to keep these bridges functioning for you for decades to come.

Why do the bridges need to be closed for two weeks?

After crews complete repairs to the bridge joints and remove existing concrete, the new concrete will need time to cure before traffic uses the bridge. Currently, we expect curing time to take at least three days. Placing traffic on the bridge before the concrete has time to cure will result in rapid deterioration of the new surface. That results in wasted time and funds and more closures in the future.

How will these closures affect my commute?

During the closures, we expect delays from 5 a.m. to 11 p.m. on I-84 and surrounding interstates. Travelers should consider alternative transportation.

Will city streets see congestion during the closures?

City streets will also see delays due to people avoiding the backups on I-84. Even if you do not use I-84, expect to see congestion on the city streets that you depend on every day.

What is ODOT doing to help deal with the expected gridlock?

We are working with the City of Portland, Multnomah County, TriMet and C-Tran to address the increase in congestion on alternate routes. Details about how we plan to help our streets work better during the closure will be available in early summer.

I absolutely must drive this route and plan to sit in the traffic. What are the detour routes?

During the ramp closures, travelers do have the options of following detours that will take you to your destination using the available ramps and Interstate 405. But it will be a long, frustrating drive.

Rehabilitating the busiest interchange in the state means closures

147,000 vehicles a day on average travel through I-84 at I-5.

1964: I-84 at I-5 interchange opened.

1995: The last time concrete was replaced at the interchange.

2018: Two week closures on each ramp in July and August for new concrete and steel joints and rail.

5 a.m. to 11 p.m. expect gridlock on I-84 and nearby streets during ramp closures during the multi-day closures.

July-December 2018 is when construction is occurring.

WHAT TRAVELERS CAN DO

Telecommute

Adjust work schedule to avoid peak period of travel

Avoid the area

Take transit

Ride a bike

Take a vacation
